Product Details

Four Advantages

Easy styling

(1)(2)(4)

Easy Maintenance

(3)(5)(7)

Affordable

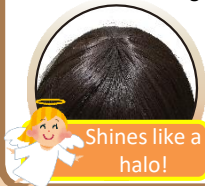

(6)(8)

Safe

(9)

(1) Lightweight and natural looking

Thanks to our synthetic fibers, it's half the weight of standard wigs and realistic with a natural shine & feel

Shines like a halo!

Comparison of surface fibers

Real air wig fiber

Conventional fibers

Sign of imperfections on surface fibers makes the wigs more realistic and high-quality!

(2) Easy to brush with fingers

Maintain the shape and allows for styling

Style 1:
Quick brush for natural look

Style 2:
Create volume combing fingers through the wig

(3) Twice the durability of standard wigs

Washing causes no damage

(4) One size fits all, Easy to put on

Elastic bands adjusts the size

Velcro holds wig in place

(5) Washable & safe for use with regular shampoos

(6) Zero Maintenance Cost

\$\$/฿

(7) Easy to store & bring

It never creases & retain its shape even if crumpled in a bag for 1 week!

(8) High Quality Affordable

Everything is done in-house to reduce costs and eliminate the middle man

Our factories in China using fibers made in Japan

(9) Clinically-proven to be safe for human use

Perfect for delicate scalps with no harmful chemicals

- Original heat-resistant fibers made in Japan can withstand up to 180°C
- Can be used with hair styling tools(hair dryer, curling iron, etc.)
