

# WINNERLIGHTS

Have you ever seen  
glowing bibs ?  
changing color ?

Winnerlights  
trains  
Perception  
Understanding, and  
Decision Making

## 1. About Winnerlights

Winnerlights is an innovative perception training system providing effective training methods to improve the perception and decision-making skills required for various kinds of sports. About 70% of mistakes in games come from the process of perception through decision, but presently training is focusing heavily on execution. Understanding this discrepancy, Winnerlights provide various training programs by changing colors of bibs or goals using devices such as smartphones, enabling the latest training based on AI analysis.

## 2. Advantages

- Provides various training programs depending on levels from grass roots to professional.
- Swiftly do training without instructions by changing the colors of bibs or goals using digital devices.
- Easy-to-use inexpensive human interface with compact design.

## 3. Sales performance

The prototype system has sold 300 units, and is widely used in Europe including professional football teams, football schools or Football Associations.

## 4. Expected customers

Football teams, football schools or Football Associations  
Sports entities, such as basketball, handball, hockey, etc.
